• *	On 15 April 1955, 12 single-engine trainer aircraft of an unidentified type which were definitely not jet aircraft, were observed parked on the landing field of Jocksdorf airfield, approximately in line with the flight control station. The taxiway was apparently not yet connect to the eastern and western ends of the runway, but there seemed to be a connection in the middle. Construction still continued on the taxiway Clearing work was still under way east of the field and east of the	25X1

The taxiway was apparently not yet connect to the eastern and western ends of the runway, but there seemed to be a connection in the middle. Construction still continued on the taxiwa Clearing work was still under way east of the field and east of the concern. It is believed that Jocksdorf airfield has now been occupied by a VPL unit. The aircraft observed presumably are Yak-11s or Yak-18s.  On 30 March, 2 S-type cars with large crates moved from Cottbus to Simmersdorf (unloading station of Jocksdorf), 6 S-type cars with large crates and 1 tank car proceeded	25X1 ed 25X 25X 25X
